TECHNICAL SKILLS

Languages | Python, Java, JavaScript, SQL, HTML5, CSS
Backend | Django, Node.js, Spring, PostgreSQL, FastAPI
Frontend | React, Tailwind CSS, Vite, Three.js
Tools & Database | GitHub, VS Code, Codex, Postman, DBeaver, Blender, Docker, Unreal Engine 5

EDUCATION

Bachelor of Science in Computer Science May 2026
Georgia Southern University Statesboro, GA

LEADERSHIP

Vice President August 2025 – May 2026
Association for Computing Machinery (ACM) Georgia Southern University

- Led planning and execution of ACM events for 150+ students, increasing engagement and participation.
- Coordinated with respective student affairs or other chapters to showcase QR Scavenger Hunt during organization fair/hackathons.

WORK EXPERIENCE

AI Model Generation Team Lead – Capstone Jan 2026 - May 2026
Gulfstream Aerospace Corporation Savannah, GA

- Led development of an AI-powered 3D asset generation platform using FastAPI, React, Three.js, Blender, and Unreal Engine 5.
- Collaborated directly with Gulfstream stakeholders and designers to translate business and visualization requirements into scalable technical solutions.
- Built backend integrations for TRELIS, TripoSR, and ModelsLab to support text-to-3D and image-to-3D mesh generation workflows.
- Developed Blender-based mesh normalization workflows for scaling, grounding, pivot alignment, axis correction, and Unreal Engine compatibility.
- Implemented interactive 3D visualization tools with React and Three.js for mesh inspection, scaling, rotation, translation, and material previewing.

Trainline | Django, React, MySQL, Docker, Axios Spring 2025 – Present

- Built an independent full-stack train booking application using Django REST Framework, React, and a relational database with end-to-end SDLC and MVC-based architecture.
- Implemented user authentication, trip browsing, ticket and seat selection, payments, notifications, and chat functionality through custom frontend and backend workflows.
- Improved production readiness by documenting Docker-based deployment, environment-based secret management, Unicorn configuration, security headers, and authorization/input-validation fixes.

Student Assistant September 2022 – December 2024
Georgia State University Atlanta, GA

- Led and trained a 10+ member team, improving order turnaround time and punctuality

PROJECTS

Flight Booking Web App | Spring, PostgreSQL, HTML/CSS Fall 2024

- Designed a normalized relational schema for users, flights, seats, authentication & a CRUD based system.

meeting-to-tasks | FastAPI, FAISS, Ollama, Sentence-Transformers, GitHub REST API Fall 2025
